

# Seznam všech dřevin 1. až 4. dílu

- 123 obyčejnou kurzívou jsou označeny stránky s textovými informacemi o příslušných dřevinách (nalézající se mimo obrazové tabule)
- 175 čísla obrázků dřevin jsou zelená
- 650 bod označuje číslo obrázku s perokresbou dřeviny
- 371 tučným písmem jsou označeny stránky s obrazovými tabulemi konkrétních exemplářů; podtržení čísla (**371**) znamená, že jsou listy příslušné dřeviny vyobrazeny ještě v příloze se scany; křížek † označuje uhynulou dřevinu
- 1662 obyčejným písmem jsou označeny stránky s tabulkami či souhrnnými tabulemi listů dřevin (str. 1661-1730)
- 1755 dřevina, která je součástí plánů lokalit (str. 1752-1825) anebo navržených turistických tras (str. 1832-???)
- 1858 dřevina, která je součástí finálních statistik (str. 1858-1881)

– exemplář s přechodovými znaky mezi uvedenými druhy či kultivary označuje vlnovka bez mezer ('Aspleniifolia'~'Laciniata'; *tomentosa*~*petiolaris*), v případě pochybnosti při určení druhu/kultivaru je vlnovka před jeho jménem (~*ponderosa*). Vlnovka s mezerami značí nedourčeného jedince se znaky uvedených druhů či kultivarů (*cephalonica* ~ *nordmanniana*).

– následující seznam dřevin obsahuje pouze takové, které jsou v nějaké souvislosti uvedené v 1.–4. dílu Stromů České republiky. Není to ale seznam všech námi zaznamenaných druhů a kultivarů z našeho území.
